#### **Commentary on 2023 Performance**

The Board of Directors of Izwe Loans Zambia Plc (the "Company" or "Izwe") are pleased to present the condensed audited financial results for the financial year ended 31 December 2023. This publication does not contain full or complete disclosure details. The financial statements, from which this condensed version is derived, have been audited by PricewaterhouseCoopers and a copy of the auditor's report is available on request.

#### **Inspiring Progress**

We have continued the execution of our key strategic goals to position Izwe as a diversified financial services business that will provide solutions to both businesses and individuals. We have further expanded our footprint and onboarded new product offerings in a bid to enhance embedded shared values for our customers, as we help change their lives and support their businesses growth.

Significant progress under these priorities have been recorded in launching Izwe Pay, a first-in-market payment solution that allows businesses to accept swift and safe mobile money and card-based payments through a single point-of-sale machine. The business has also rolled out refreshed branding material that is forward looking and positions us well for a more digitised future. Izwe also relocated its registered Head Office to a prime location on Addis Ababa Road to introduce the re-imagined brand to the market.

### **Financial Highlights**

Izwe's 2023 results demonstrate our sustained momentum in business performance anchored to our new strategy. The Company's gross revenue increased by 37% to ZMW600.1 million supported by strong balance sheet growth and an increase in customers. In the year under review, net earning assets expanded by 49% to ZMW1.5 billion, demonstrating year-on-year sustained performance. Our transformative investments continue to deliver desired results which has led to a 183% growth in the secured lending loan book to ZMW54.7 million in 2023.

The 2023 financial year proved to be one categorised by elevated interest and hedging costs, as the Bank of Zambia's Targeted Medium–Term Funding Facility (TMTRF) started maturing. The Company however, continued to diversify its funding sources, with borrowings increasing by 79% to ZMW1.0 billion to fund the increase in demand from clients. As a result, there was a marked increase of 87% in interest expenses from ZMW60.5 million in 2022 to ZMW113.1 million in 2023.

Izwe continues to manage its credit quality prudently. As a result, impairment losses reduced from ZMW50.0 million in 2022 to ZMW2.3 million in 2023, with large portions of the arrears book having been successfully cured.

Operating and finance costs increased by 57% to ZMW201.7 million largely in line with our budgetary expectations on the back of an elevated inflationary environment caused by the depreciation of the Zambian currency against major convertibles. Despite the increase in costs, we kept our efficiency levels (cost-toincome ratio) within our risk appetite limit at 38%.

Izwe exceeded its profit after tax estimate for the year 2023 increasing by 44% to ZMW190.0 million compared to a profit after tax of ZMW132.0 million reported in the prior year. This represents an increase of 50% in earnings per share to ZMW1.94 and an increase in return on equity from 34% to 40% year-on-year.

Year on year, the Company recorded an increase in operating cashflows, in line with the increase in loans disbursed. Utilisation of cash in investments rose, as we invested in property and equipment for the enablement of strategic goals. Financing cash flows increased as we took a responsible approach to managing funding and maintaining an efficient level of equity.

### **Capital and Dividend**

The business continues to be anchored on strong shareholder value, with total equity increasing by 24% from ZMW382.8 million to ZMW472.8 million, while maintaining a capital adequacy ratio in excess of the minimum regulatory requirement.

Following this strong performance, the Board of Directors resolved to declare an interim dividend of K100.0 million with respect to the financial year ended 31 December 2023 (2022: Nil). This represents a dividend per share of ZMW1.02.

## **Economic and Business Outlook**

The Bank of Zambia has adopted prudent monetary policy measures to counteract inflationary pressures and protect the local currency under volatile global market conditions brought about by spreading geopolitical tensions. The current outlook is that inflation will remain above the target range of 6-8% pa, primarily driven by persistent depreciation of the exchange rate and impact of the adverse weather conditions on food prices. These factors also led to the revision of the statutory reserve ratio which compounded the general liquidity conditions in the economy.

Management is cognisant of the economic outlook and despite these challenges, the overarching commitment of Izwe remains focused on sustained growth for the benefit of all stakeholders. Our focus remains to make the key decisions required to continue generating enhanced cash flow in the dynamic and challenging operating environment we are in.
